

Equal Opportunities Workshop: Presenting Data

For a compelling presentation of one's research, more than just great data is needed. The audience should be picked up and carried along by the speaker. This can be achieved by making the visual presentation of the slides appealing and clear.

Furthermore, the posture, voice and presence of the speaker play a significant role in the presentation's success.

In this workshop, you will ...

- learn how to adapt presentations to the audience in storytelling and slide design
- learn how to use your body: voice, body language and presence in the room.
- will be introduced to presentation tools that can be tested in exercises

Coach

Dr. Juliane Handschuh is a trainer who supports scientists with personnel development. She is a Neurobiologist and earned her doctorate at the Leibniz Institute for Neurobiology in Magdeburg. She completed several advanced training courses in coaching, mentoring and diversity and is now working as a full-time Soft Skill Trainer for scientists.

In her seminars, she focuses on strengthening key competencies such as communication, leadership, career development, time- and self-management, as well as the presentation of one's science in written and visual form.
